

Counter Cheat Sheet

CHECK-IN, IN UNDER 3 SECONDS

1 Player shows their QR

Atlas app → Home tab → tap **Check In**. Their code appears on screen.

2 You open the scanner

In Atlas Owners, open the event → tap **Scan to Check In**.

3 Point & hold

Camera stays open — the result flashes on screen the instant it reads.

WHAT THE SCREEN TELLS YOU

Green flash

"[Name] checked in"

All clear. Booking, waiver, and payment already checked — wave them through.

Red flash

"**Already checked in**" — they're in, no action needed.

"**Different event**" — wrong scanner open. Check the event name.

"**No booking found**" — they haven't booked. Have them book from their phone, or search below.

"**Not a valid code**" — not an Atlas QR. Try Manual Check-In.

No scanner? Search by name instead

Open the event → **Manual Check-In** → search their callsign or real name. Each result shows two tags — read them before you tap Check In:

✓ **Waiver signed** ⚠ **No waiver signature found**
