

## Quick Fix Card

FIVE THINGS THAT COME UP AT THE GATE

### "My phone died / I don't have it."

**Fix:** Open the event → **Manual Check-In** → search their callsign or real name. Same waiver and payment status shows right there — no phone needed on their end at all.

### Scanner won't open, or the camera's stuck.

**Fix:** Close and reopen the app, try again. If it still doesn't work, skip the camera. **Manual Check-In** does the exact same job by search — check permissions later, don't hold up the line for it.

### Someone shows up without booking ahead.

**Fix:** That's exactly what Atlas's walk-on flow is — pull up today's event, they book and sign the waiver right there on their phone, and they're in just like anyone who booked ahead.

### "I paid, but nothing's showing up."

**Fix:** Have them check their email for a Stripe receipt. If payment really went through, the booking usually appears within a minute. Still missing after that — note their name and follow up, but don't check someone in without a real booking on screen.

### A minor's parent isn't at the counter to sign.

**Heads up:** Atlas doesn't have a separate minor/guardian waiver step yet — there's nothing in-app to fall back on here. Handle it exactly the way your field did before Atlas.
